

LEADERSHIP DEVELOPMENT DAY FOR IT MANAGERS

High-performing teams start with confident leadership

Practical **leadership development** for **IT managers** who want to lead people with greater confidence, strengthen team performance and build positive team cultures.

More than a one-day workshop, this is a leadership development experience designed to create **lasting behaviour change** through **preparation, application** and **reflection**.

YOUR IT MANAGERS ARE UNDER PRESSURE

They're managing a lot - demanding stakeholders, constant change and teams that rely on them for every decision.

-  Too much firefighting.
-  Not enough strategic thinking.
-  Tension inside the team.
-  Projects dragging.
-  People feeling overwhelmed and disconnected.

I've spent more than 30 years working with technology teams in professional services. **And I can tell you – it doesn't have to be that way.**

HERE'S WHAT CHANGES WHEN LEADERS FEEL CONFIDENT AND TEAMS WORK WELL TOGETHER

- ✓ Managers spend less time firefighting and more time thinking strategically
- ✓ Teams take more ownership and solve problems proactively
- ✓ Everyone feels calmer, more energised and more connected
- ✓ Projects move faster with few delays
- ✓ There's more trust, more momentum and more confidence across the team
- ✓ Good people stay longer, because they feel supported and valued

INTRODUCING THE LEADERSHIP DEVELOPMENT DAY FOR IT MANAGERS
